

Title of the Project:

"Innovative Physical Activity Measures in Health and Sport Science Studies"
Nr. EEZ/NFI/S/2015/021

Project partners:

- LASE
- Norwegian School of Sport Science (NSSS)

Aim of the project

The project aims to strengthen bilateral relations between higher education institutions in Norway and Latvia providing study programs in sport science and health care disciplines. The project activity outcome will be development and implementation of innovative study module on health and social indicators in inclusive physical activities at the Latvian Academy of Sport Education. This project will have synergy with the research project "Health and Social Indicators of Participation in Physical Activities for Children with Disabilities" (Nr. NFI/R/2014/070) coordinated by the LASE.
