

Latvian Academy of Sport Education in collaboration with the education center “A Sports” of the Latvian Disabled Children and Youth Sport federation organized professional development seminar for about 30 in-service teachers, physiotherapists and other professionals interested in “Planning, implementing and monitoring sport activities for children with functional impairments”. Location of the seminar was Riga’s secondary school nr. 66. Seminar program included practical and theoretical sessions provided by LASE researchers Aija Klavina (project coordinator) and Zinta Galeja about posture assessment and daily physical activity level. Seminar was organized within the Research and Scholarship Programme (LV05) co-financed by the EEA and Norway Grants project “Innovative Physical Activity Measures in Health and Sport Science Studies” (nr.EEZ/NFI/S/2015/021).
